OTHER COMMENTS*****
-----*

The water is to be supplied to irrigate lands located within the Central Enterprise Water Association (i.e., the water is to be drawn from its wells, and used within the service area of its distribution network, only for irrigation purposes).

Central Enterprise Water Association, by signing on this application, agrees that the application is feasible and desirable; that the combined sources can provide the water to be diverted under this application as well as all other water rights which are approved to be diverted from those sources; that one share of stock in Weber River Water Users` Association on which this exchange application is based is to be perpetually dedicated to form the basis of this application; that their heirs or successors in interest are bound to continue to dedicate one share as above described so long as the exchange application is to be kept in good standing; and that the water may only be served to irrigate land within the service area of Central Enterprise Water Association from its facilities and only under its direction. No indoor domestic use is designated for this application, in accordance with Bureau of Reclamation and Weber River Water Users` Association criteria for use of water in the Weber River Project (Echo Reservoir).

Weber River Water Users` Association, and Bureau of Reclamation, by signing on this application, each agree the application is feasible and desirable; and agree that the same amount of water diverted from wells under the application shall be released from Echo Reservoir as the river commissioner calls for it.

The foregoing statements are not limiting, but are made solely to add and acknowledge additional special conditions of approval of this type of application. It is the applicants` responsibility to comply with all statutes governing the application.
